GRACE SPOTLIGHTER

Maundy Thursday—
7 pm - Divine Service
Good Friday—
9 am - CrossWalk
(Pilgrim, Essexville)
1 pm - Horizon Center
7 pm - Tenebrae
Easter Sunday—
8 am / 10:30 am -
Resurrection Festival

THINGS WOULD NEVER BE THE SAME AGAIN

Through the curtain of mist which hung before sunrise on the western hills of Galilee a shiver of joy ran through the brotherhood of Jesus' beloved ones. From the water's rim they heard the sound of His voice skim the surface and a glow of fire piloted them toward shore.

The turbulent, glorious days of Jesus' crucifixion and resurrection were accomplished. Now the disciples were back home working. And into that waxen hour Jesus came. When men were stripped down for work Jesus revealed Himself into the life setting of a workday morning. Things would never be the same again.

At an unexpected moment the Lord appeared to them as if to say; it doesn't matter the day, the hour, the place, or occasion, Easter isn't over! From now through eternity itself, at your every morning, at every meal, inside every activity it will never be the same again for you.

The dynamic of Easter is not a pause in the day's occupations but propulsion into new life!

Because of the events of Easter, the bodily resurrection and victory of Jesus Christ over death, we are literally propelled from our own unprofitable darkness into the whole-hearted, life-long, chock-full, overflowing joy of Easter brimming, like nets bursting with fish, in the never-ending color, aroma, and relish of life. The grace of Easter is ours forever.

Via Easter we may now get on with real living!

"Get on with your life" is another way of saying, "Leave your troubles behind and enjoy the carefree privilege and zest of having been re-born which not only sounds mighty wonderful Easter morning but is also directly intended for the gray chilled twilight when a man comes off the night shift.

When we encounter times of personal reversals, when life seems like a string of inevitable disappointments, when God sometimes seems to have failed to vest us with a bit of the divine energy that brought

Jesus from the grave, we are reminded Easter isn't over—death is!

Things will never be the same again! For any of us!

Isaiah wrote, "*On this mountain (that is Calvary) he will destroy the shroud that enfolds all peoples, the sheet that enfolds all nations.*"

Because of Jesus' resurrection, things will never be the same for you and me. Death is over, and with its destruction go all its accessories: the distress of the women, the perplexity of the disciples, the fear of the upper room, the doubt, the weeping, the grief, all past failures and misdirected thoughts.

It's like when a sickness is taken away, and with it go the pills, lozenges and plasters, the elixirs, therapy, and tonics, as well as the pain, the bacteria, the weakness, the depression, the infection, and everything else associated with it. "*The last enemy to be destroyed is death,*" Paul wrote to the Corinthians.

Easter is the new day. Live in confidence, in power, and in grace. Just hearing John say from the boat, "*It is the Lord*" is the greatest single antidote for discouragement. Our Lord Jesus makes all the difference in the world! We are not just celebrating His resurrection, but also our own!

Pastor Reed

Computers and Young Children

by Petrer Fredrich, Principal

Young children think and learn in different ways from older children and adults. The brain of a young child has the enormous task of developing language, social, and emotional skills that will enable that child to successfully learn everything else needed to survive and thrive. From age 9 to early adulthood, the brain undergoes major changes that allow it to use the skills learned in the early years. Pushing skills appropriate for older children on to younger children can have negative effects, especially when the learning of those skills prevents other important learning.

This explains why reading to a young child will create more advantages than starting a child on an early reading program with phonics and flash cards. Reading to a child supports language development, and children need fully developed language skills before they can make good use of sight words and decoding skills. We can give our child advantages early, but we need to practice discernment and have respect for the learning system God created for His youngest children.

Computers and their programs become obsolete at an astounding rate. The computer activities your children are using at school will change by the time they reach high school. Think about what you did on computers as a grade school student – if you even had them. Chances are your current cell phone has more computer power than the machine you used back then. Children should be comfortable with computers, but this does not require computer introduction at a very young age. Given the emphasis on computer learning in school, children will have ample exposure before middle school.

When you review software or applications, beware of educational promises. Little research has been done on computers and learning, primarily because computers change so fast there isn't time to complete the necessary research. Many computer products assume learning happens. For example, a game that promises to develop problem solving skills may only be teaching your child to memorize the steps needed to get to the

next level or to try any option without thinking things through. Children need to learn to stay focused on a problem and to begin to apply logic by understanding consequences. Computer play encourages them to bounce from one thing to another, and in the virtual world of computers, there are no real consequences.

When the business world considers a course of action, it often conducts a cost/benefit analysis. It is unwise to assume that any change—even a change for the better—is the best choice in the long run. Because young children have many important skills to develop in little time, a cost/benefit analysis should also be used when deciding to encourage children to use the computer. Computer, video games, and television all involve screen time, and the recommended amount of screen time for children can be as low as two hours per day.

In addition to increasing the chances of obesity, lengthy amounts of time spent sitting in front of a screen also replaces the learning of more immediate skills. Young children need to develop language, emotional, and social skills. We know that children develop these skills when they play with each other. The more time your child spends on the computer, the less time your child spends developing the skills that are so important to future learning. This is the cost/benefit analysis: Spend a lot of time on computers now, and the cost may be difficulty with learning later. For young children, the distinction between education and entertainment frequently is blurred. This is great when your child is enjoying a good book or building a skyscraper out of blocks. Learning should be fun. The computer is best used, however, when it's seen as a tool for learning rather than entertainment. A child can have all the memorized facts in the world, but will not be able to use that knowledge if he doesn't work and play well with others. If you find yourself saying "But he loves it!" remember that many people who develop computer programs are more interested in marketing than education. Even if your child loves playing on the computer and seems to be very good at

it, she still needs to learn other things.

Children need to become adept at the workings of the real world before they become experts in computers. Playing with blocks, painting, experimenting with water play, climbing on the monkey bars, etc., are all skills that will support future computer skills. These activities develop visual spatial skills. A child needs to be able to manipulate the three dimensional world, in which he lives, before he can manipulate the two dimensional world of the computer. It is ironic, yet true, that the less a child plays on the computer when she is young, the better chance she has of learning how best to use it when she is older. Remember that Bill Gates and Steve Jobs did not learn about computers until they were well past early childhood.

If you have young children and are worried that you need to provide them with a computer before it is too late, set your worries aside. Your child does not need to have a computer. Even a small amount of computer time at preschool or at a friend's house will be more than enough to acclimate your child to the world of computers. If you have a computer available for your children, don't worry that you are ruining them for life. Do not assume, however, that all computer time is beneficial. Parenting is about balance and teaching children to make wise choices. Let children be children so their brains can grow and develop. This is part of God's plan for them.

Your School Board recognizes our challenging economy and as a result, next year's registration fees will see only a minor increase. Our Open House/Early Registration will be April 20 in the evening. **Anyone that registers their child (ren) in April and pays a \$100.00 deposit, will only have registration fees of \$275.00.** Later registration will pay \$300.00. By registering early, parents will save \$25.00! The Board has also undertaken efforts to extend the mission of our congregation and bolster enrollment by eliminating tuition fees for non-members. Our goal is to feed new students God's

Continued next page

Continued from previous page

word as well as get new faces in our school. We are convinced that once they enroll and become a part of our school family, they will stay.

To advertise and promote our school, the School Board has undertaken two promotional venues. Lawn signs have been purchased and are available free of charge for you to display in your yard. We also have T-shirts available for sale. They are being sold for no profit and also will advertise our school. The "Amazin" Grace shirts can be purchased for \$4.00 each, \$5.25 for the big boy XX size. Deadline for orders and payments is March 31.

Our first Kindergarten round-up was

held March 23, with our second scheduled for April 29. If you know of any eligible 5 year-olds, at least make them aware of the date.

Good Friday is April 2, and is the first full day of our spring break, followed by the week after. Bay

City Public Schools are taking Holy Week off, so their will be no bus transportation March 26 – April 1. Classes resume Monday, April 12. Achievement testing for all of our students will take place that first week back, April 12 - 16. Please make efforts to insure that your child does the best. Make sure that your children get plenty of sleep, receive a balanced breakfast and lunch, and receive a lot of encouragement and praise for jobs well done. As soon as results are available, parents will receive a copy of their children's test results.

JUNIOR HIGH HIGHLIGHTS

Religion instruction discusses God's power and grace in the church following Pentecost. The students will understand that we are a part of the New Testament Church. It is essentially a study of the Book of Acts. We are "fearfully and wonderfully" made. We have just begun the study of the human body systems. Life Science will focus on the skeletal, muscular, and digestive systems of the human body. Our history studies have brought us to the time of the Great Depression. President Roosevelt led the effort to create a variety of government programs and agencies designed to pull America out of the Great Depression. Roosevelt's overall plan for national economic recovery became known as the New Deal. Sixth grade math studies have focused on finding the perimeter and area of polygons – triangles, parallelograms, rectangles, and squares. Now we move on to the circle. Area is still area, but perimeter is now circumference. All this is just a little confusing. Mathematics is a part of each of our lives. We use it when we figure our incomes, go shopping at the grocery store, or examine our monthly Consumers Energy bill. The seventh grade will look at these topics as well as additional ones for April's math discussions. The graphing of ordered pairs, relations, and equations are challenging our eighth graders this month. By the end of the month, they will have solved problems by making a table, determined if a relation is a function, and will have written equations to express a relation.

Miss Rudick's Class

Lutheran Schools' week was an especially fun week. We enjoyed all of our many activities from breakfast on Monday to Crazy Dress day to the joint worship service at Immanuel Lutheran School in Bay City to our video and ice cream on Friday. It was truly a fun week. At the beginning of that week we also welcomed a new first grade boy into our classroom. Welcome Michael Schmidt and his family. We are very excited to have a new student!

During our devotion time we

Our new student Michael

are using a resource called Resurrection Eggs. They are Lenten devotions covering 12 days to help children understand the season of Lent. The devotions end with Easter and the empty tomb.

In Religion we have been studying Holy Week and the events that led up to Jesus' suffering and death.

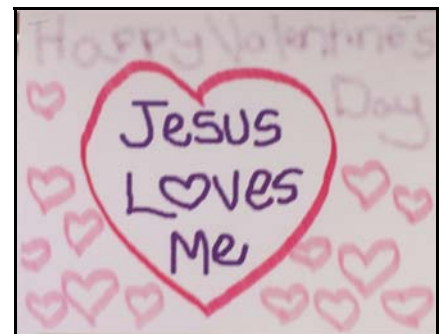

In science we continue our study of magnets. In social studies we are beginning our study of major events and people throughout our country's history.

In math the kindergarten students continue to practice addition facts, they have now begun to learn their subtraction facts. They have also begun to learn time to the quarter hour. 1st grade students are learning more about place value, money

values, and different measurements. They also continue practicing 2-digit addition and have now started 2-digit subtraction. 2nd grade students continue to work more with basic geometry, multiplication and division facts. Their story problems also use multiplication and division to solve.

In reading the kindergarten students have begun reading books with longer sentences. They have learned many sight words and can sound out many words now. They are also learning to identify fantasy and reality.

1st and 2nd grade students continue to read and build their A.R. points. The 1st grade students are beginning to work with linking verbs. 2nd grade students have begun working more with possessive and plural nouns. It is all very challenging work.

Learning to use our computers.

Thank you for supporting our school. We do appreciate being able to learn in a Christian environment.

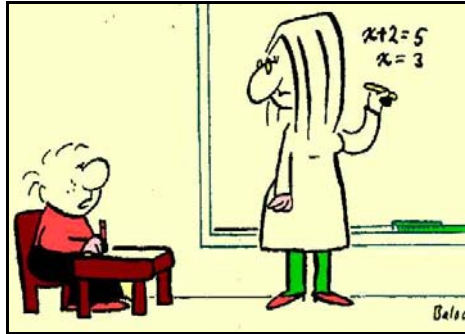

Gledhill's Gators

Spring has sprung! Of course, if you'll recall, it was snowing on the first day of spring. But, it was just winter's attempt at one last spurt of cold. Now grass is coming back to life and buds are showing through. The students are also showing their "new life" as they are enjoying the outdoor weather.

I had the wonderful opportunity to attend the 57th annual MSTA (Michigan Science Teachers Association) conference recently in Lansing. One of the many great resources and ideas I obtained was a packet of information of "How to Take Science Outdoors". I think it is important to leave the norm of text/worksheet/sitting routine that we all too often get comfortable in. Not only to break the stagnant nature of it, but what better place to learn science than to experience it, wherever possible. I will enjoy trying them out for the remaining couple of months this year, and anticipate making them a large portion of my curriculum next year. It also just so happens that our Social Studies unit is exploring the envi-

ronments, and climates of communities. We have seen ours go through some rather extreme differences. How did it affect plant life? How did it affect animals ready to return from their southern migration? These will be pertinent discussion starters.

I am proud to announce that 3rd grade has stepped into the vast

**"Just a darn minute!
Yesterday you said X equals two!"**

(and sometimes confusing) world of algebra. I suppose at this stage it would be more aptly named pre-algebra. I believe they were having

nightmares at first, but as the light bulbs having been slowly flickering on, they receive a sense of gratification to have surmounted such a task.

I would also like to share a new concept that I have picked up in my masters course that I am currently taking. It is called *See, Think, Wonder*. I have about 400 *National Geographic* magazines that were donated to me (thanks a lot, Mrs. Lance...), and they have been perfect! The concept is this: I use a full-page photo and cast it onto the screen with the opaque-projector. The students will tell me simply what they *see*. Then they tell me what they *think*. This is something that is not obvious. Then they tell me what they *wonder*. This is an activity that gets them thinking outside of the box and activates the brain in preparation for learning. They really enjoy it!

Enjoy the arrival of spring, and I hope all your flowers survived the mystery-snow. Blessed day.

**School Assembly
on the
Magic of Science
sponsored by CPTL.**

Grace Lutheran Easter Breakfast

Please join the 6-8th graders on Easter morning between services for our wonderful breakfast. Our menu includes:

Scrambled Eggs

Pancakes

Home made Sausage

Baked Goods

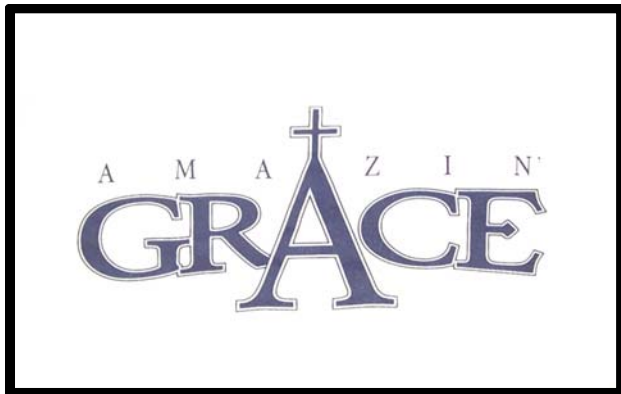

Fruit

Juice

Coffee

This is a free will donation event for their end of the year class trip.

“Amazing” Grace T-Shirt

Get your “Amazin” Grace t-shirt ! Wear it around the community and show your Christian & school spirit. The cost is \$4.00, \$5.25 for XX. T-shirts are available for sizing in-between church services. Deadline for orders and payments has been extended until **April 12**. Any questions contact Michele Man-
tei at 989-233-0388.

Celebrate 34 years of teaching and his retirement at the end of this school year with Mr. Pete Fredrich on May 23, 2010. The Grace congrega-

tion will honor Mr. Fredrich in the 10:30 service and at a chicken BBQ and potluck dinner afterwards. Envelopes for donations towards a retirement gift will be placed in the church mailboxes. If you have a memory, funny story, or something you'd like to tell about Mr. Fredrich, please jot it down and give to either the office or e-mail it to Rhonda Klann (jrklann@chartermi.net). If you'd be willing to share your story at the potluck, please let us know. Any pictures out there of a young Pete?? If you see former students, please pass the word. Mr. Fredrich has touched so many of our lives, we'd like to show him how much with a loud Thank You!

WOMEN WELCOME SPRING!

Ah-h-h! The winter blahs are behind us and now we can celebrate spring. Ladies, let's start by enjoying lunch out on Saturday, April 17, at The Memory Lane Cafe located in the Saginaw Antique Warehouse on Tittabawassee, east of I-75. (A menu will be posted on the church hallway bulletin board for you to look over.) The cost of each lunch will be covered by the Ladies of Grace. After lunch we can browse the Antique Center and reminisce of bygone days. Plan on carpooling from the church at 11:00 a.m. Please let Rosie - 662-6120 or Sue - 662-7900 know if you can attend by Wednesday, April 14.

On Saturday, April 24, we will be traveling to Prince of Peace, Clare, for the LWML Spring Rally. After beginning at 9:00 a.m. with registration and a light breakfast, our speaker, Linda Bruski, will share her adventure of a short term mission trip to Poland through MOST Ministries. Registration cost is \$4.00 and an in-gathering of disposable diapers will be donated to the Clare County Baby Pantry and the Mid Michigan Community Action Agency. We will meet in the church parking lot at 8:15 a.m. for carpooling.

Then, of course, we look forward to our **May 9th (after church) Pie Sale** - perfect for Mother's Day dinner. All women of Grace and yes, men too, are asked to provide a homemade pie (or more) for sale. Men, Pastor will make some pies, so if he can do it, you can too! We're eagerly anticipating this fun event!

Thrivent Bay County Chapter

Come and join us for an economic and investment outlook seminar so that you can make more informed investment decisions. This meeting will be held on Sunday, April 25 at 3:00 pm., at Trinity Lutheran School Call 686-9620 to register by Tuesday, April 20th. There will be an Ice Cream Social after.

Thrivent Phase Out We have exceeded the "phase out" amount that Thrivent has allowed us for the final matching gift they will give us this year. Therefore, going forward, do not write any more checks to the school as there will not be any further matching gifts received from Thrivent. We have been informed that information on the new 2010 program will not be available until June.

Seminary Kantorei

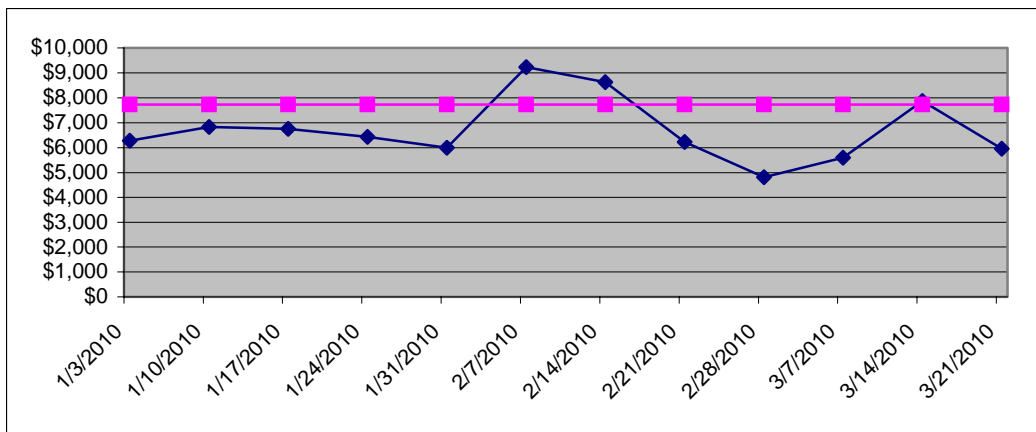

The Kantorei, touring chorus from Concordia Theological Seminary, Fort Wayne will sing an Easter Choral Vespers, Wednesday, April 7, at Christ the King Lutheran Chapel, on the campus of Central Michigan University, Mt. Pleasant. The Elders have adjourned the Wednesday mid-week service immediately following Easter in order to enable members to attend. The Kantorei Choral Vespers begin at 7:30 p.m. are open to all without admission cost. There will be carpool opportunities.

Seaver Installation

The Installation and Divine Service at which Pastor Wade Seaver will be established at pastor of Hope Lutheran Church, Bellaire, Michigan, is scheduled for Sunday, April 18, at 4:00 p.m. Should there be those who may wish to attend the Installation and consider carpooling, please make your thoughts known.
